

Fueling Your Success

Emerson Natural Gas Pressure and Flow Control Solutions

Powering New Technology in Pressure Control

Natural Gas Solutions Designed to Deliver Reliable Results

Emerson puts the power of advanced technology and engineering in your hands. As the world's leading provider of natural gas pressure regulation products and services, Emerson brings innovative design, reliable performance, and unbeatable durability to the natural gas industry. Our Fisher[®], Francel[™], and Tartarini[™] regulators are known as the industry standard for performance and extended service life — and we're continually raising the bar through new product design, testing, and research. Emerson is committed to continuing our investment in the future of this precious resource — and we're proud to be your source for unparalleled experience, expertise, and innovation.

Testing the Type EZH with Whisper Trim[™] Noise Attenuation Technology in Emerson's flow laboratory in McKinney, Texas.

Engineered to Meet Your Expectations. Tested to Exceed Them.

It's one thing to follow technology. It's another to lead. With global Technical Centers located in China, Romania, and the USA, Emerson is committed to advancing natural gas pressure regulator technology worldwide. It's our goal to research, design, build, and test the highest-quality, most advanced solutions on the market today — and engineer products and services that continue to meet your needs well into the future. Every Emerson product must pass our rigorous technology tests before standing up to yours. That's how we've earned our reputation for providing pressure control solutions that work — and keep on working.

Multiple Solutions. One Source.

Put our expert engineers to work for you. With Emerson customizable skids, you can access the world's most experienced engineers and state-of-the-art technology centers for natural gas resources — all while conserving your financial resources. Our skids are prefabricated pressure-reducing and metering stations designed to your exact specifications, then built to order. Emerson has years of experience designing and assembling regulating and metering stations — and with skid manufacturing sites in Brazil, China, Singapore, India, Dubai, France, and Italy, we can quickly respond to local specifications, no matter where you are.
