

# Process control valve services when and where you need them.

- World-class service capabilities delivered directly to you with our mobile service fleet
- Strategically located service centers housing state-of-the-art equipment
- Our technicians have instant access to Emerson product manufacturing records, engineering drawings, and product engineers
- Reliability-based maintenance and repair to help increase availability and profitability

## On Demand Services

Whether you're starting up a new plant or process, troubleshooting maintenance issues, or preparing for next generation technology upgrades, Emerson's Fisher Lifecycle Services can address your immediate and long term needs.

With a network of service centers and local business partners, Fisher Lifecycle Services puts the right experience when and where you need it. Our highly skilled technicians provide effective maintenance, which helps improve valve reliability and increase process availability through flexible, local service. Backed by years of application expertise and factory authorization, our Fisher<sup>®</sup> certified technicians can provide insight into your process to help maximize operations throughout the lifecycle of your plant.

## In the Field

When you need instant answers at your plant, our world-class service capabilities can be delivered to your door. Our Fisher certified technicians are qualified with in-depth, hands-on training, safety awareness and ongoing education throughout their service career. Our local business partners include an array of professionals ready to find solutions for your toughest maintenance and process issues. In addition to our Fisher certified technicians, our mobile service fleet brings the right capabilities, tools, and equipment to your site to assist with maintenance and repairs.

## At the Service Centers

Fisher Lifecycle Services centers house state-of-the-art equipment to provide the most comprehensive service needed to address problems in your plant or process. Our strategically located service centers are factory supported with instant access to Emerson product manufacturing records, engineering drawings, and product engineers. Each site is audited yearly to guarantee quality assured repairs using factory specified and NIST traceable equipment as well as ASME Section IX qualified welders and procedures. Certified Repair services performed at our sites guarantee your Fisher valves are repaired to factory specifications, using original equipment manufacturer (OEM) parts to maximize reliability and performance.

Whether we perform On Demand Services at your place or ours, you can count on Fisher Lifecycle Services for:

- Startup and Commissioning
- Diagnostics and Calibration
- Troubleshooting and Support
- Evaluation and Repair
- Educational Training

Whatever your requirements, our highly skilled Fisher-certified technicians use advanced tools and technologies to deliver reliability-based process control maintenance and repair to help you increase your productivity and profitability. Contact your Emerson local business partner to learn more about how Fisher Lifecycle Services can address your valve maintenance and repairs on demand.
