# **Fiscal Measurement and Remote Automation**

Oil & Gas SCADA Services and Solutions

## **Innovative Solutions for a World in Action**

#### **Remote Automation Solutions**

As an Emerson Process Management division and the leading supplier of flow computers, RTUs, and presets, we are the single-source provider for your fiscal measurement and remote automation software, hardware, and management needs.

Whether in the control room or in a remote field location, we provide you with industry expertise, leading technologies, industry-proven products, and a global service and support network. All of these resources work to achieve accurate fiscal measurement and reliable control of your remotely-located assets.

## **Unparalleled Experience**

The combination of the flow computer business units of Emerson and Fisher has made us into the powerful and innovative solutions provider we are today. Because of our unique history, we are able to offer you decades of fiscal measurement, custody transfer, remote automation, and integrated solutions experience that is unparalleled by our competitors.

Our team's expertise and extensive solutions knowledge support the brands you trust:

- ROC and FloBoss™
- DanLoad™ Presets
- ControlWave®

Harnessing the power of Emerson and our unparalleled experience, our global team of experts commit to providing you with the solutions and support you want through the products and technologies you can depend on.

"Using Remote Automation Solutions flow products, we have standardized our engineering design, increased efficiencies, and decreased installation costs at meter stations across the country."

**Joseph Simonsen** Measurement Services El Paso Pipeline Group

## **Meeting Global Oil and Gas Industry Needs**

We draw upon decades of oil and gas industry experience and knowledge to meet our customer's fiscal measurement and remote automation needs. That extensive experience and knowledge enables us to anticipate industry trends, address resulting challenges, and pioneer innovative technologies to meet the demands of a world in action.

Have a tough challenge? Consider It Solved.™

## **Comprehensive Capabilities**

Whether you require a configurable, programmable, or integrated solution for your application, our product breadth provides the comprehensive capabilities required to meet your needs.

Our field-proven ControlWave, ROC, FloBoss, and TMM products lead the control and measurement industries in functionality, accuracy, and reliability. Using our robust software these products – and a variety of others – can be easily configured and managed in a communication infrastructure or control system to enable host-to-device communication.

When you need a partner to work with you to develop a new SCADA system or to update an existing one, consider us your single-source provider for every part in your process. From the production site to the pilot light, we have the products that can take your operations to the next level of success as industry practices and regulations evolve.

## **Serving the Natural Gas Markets**

# Production Flow computers and RTUs designed for the harshest environments that meet everyday production site needs and metrology approval standards

Transmission
Flow computer and
RTU technologies
with serial interface
capabilities to
meet the needs of
multi-run and multistation custody
transfer metering
system

Distribution
Flow computers and
RTUs easily handle
ultrasonic, coriolis,
turbine, and positive
displacement meter
measurements in
any gas distribution
system

#### **Innovative Solutions**

Whether your remote sites cover hundreds or thousands of miles, we use our experience and capabilities to provide innovative solutions to overcome your fiscal measurement and remote automation challenges.

Our ability to use digital field technologies like HART® and Foundation™ fieldbus as part of a remote PlantWeb® solution can:

- Improve process availability
- Improve maintenance efficiency and effectiveness
- Reduce measurement uncertainty
- Improve regulatory compliance
- Improve throughput and yield

Our innovative solutions make the best use of your resources through predictive intelligence. Predictive intelligence increases your maintenance productivity by detecting and diagnosing potential equipment problems in the field before they grow. This reduces the frequency, severity, and cost of repairs while enabling your team to avoid unnecessary and unproductive tasks.

### **Global Service and Support**

Choosing us as your SCADA or RAMS solutions provider forms a partnership that gives you access to a global support network comprised of over 200 locations worldwide. Whether you require start-up services, maintenance, or on-demand troubleshooting, every person in this network is dedicated to keeping you productive and your operations online 24 hours a day, 365 days a year.

With a variety of service, support, and training options at your disposal, you are in control.

- SupportNet<sup>™</sup> technical services
- Instrument and systems technician training
- Service personnel training
- Engineer and programmer training
- ControlWave, ROC, and FloBoss product training
- Flow measurement training
- Vocational training
- Audit and measurement system health check

Wherever you are, you get the local sales support and service you need to maintain the performance and profitability goals by which you are measured.

## **Serving the Liquid Hydrocarbon Markets**
