

Get your new radar level measurement online on time.

- *Fast, accurate commissioning*
- *On-the-job training for your staff*
- *Documented, validated installation*

Radar Level Startup Services save you time and yield precise level measurement.

What's the fastest, smoothest way to get your new radar level transmitters up and running? Simple. Just have Emerson's Instrument & Valve Services do the commissioning.

When you opt for a service agreement along with the purchase of your Rosemount® Radar Level Gauge you'll enjoy all the benefits of our wealth of expertise.

- You'll get accurate measurements of your liquid volume tanks sooner, because our experienced, factory-trained technicians will arrive at your site equipped with the

right tools, parts, and know-how to commission the transmitters properly, on time and on budget.

- Your staff will receive valuable on-the-job training from Emerson's Instrument & Valve Services technicians, assuring that they'll know how to use the equipment correctly and diagnose and resolve any basic issues.
- You'll receive a six-month extended warranty, which we can offer because we know

that your transmitters will be properly commissioned from the start.

- After the transmitters' installation, we'll contact you to make sure your transmitters still function at optimum performance.

Best of all, you'll enjoy the cost savings of a smooth, problem-free startup, and your process can be online on time and profitable.

So to get full use from your new Rosemount Radar Level Gauges in the shortest possible time, take advantage of Emerson Instrument & Valve Services' considerable expertise.

Radar Level Gauges Startup includes:

Installation Verification and Commissioning

- Verify proper mechanical and electrical installation
- Check configuration, perform diagnostic tests, and verify transmitter outputs

NOTE: Certified turnkey installation service available upon request

On-the-Job Training

- Provide basic understanding of transmitter fundamentals
- Demonstrate essential installation, operation, diagnosing, and troubleshooting guidelines

Six-Month Extended Warranty

- Warranty extended (parts and labor) an additional six months

Validation and Documentation

- Installation validation certification
- Complete electronic product documentation

Follow-Up Contact

- Verify transmitter performance
- Address additional issues
