

## DELTA<sup>V</sup><sup>TM</sup> OPERATOR TRAINING, CONTINUOUS & BATCH

# Instructor-Led Training Delivers Skilled Operators and Operational Excellence

### Delta<sup>V</sup><sup>TM</sup> Operator Interface for Continuous Control — Course: 7012 CEUs: 1.4

#### Overview

This course is for operators, supervisors and managers responsible for the operation of continuous processes using DeltaV.

This 2-day course uses lectures and hands-on workshops to provide an in-depth overview of the DeltaV Operator Interface. Students who complete this course will be able to:

- access operator displays
- manipulate various control module operating parameters to operate the process
- respond to process alarms
- monitor process performance
- view real-time and historical trend data

**Prerequisites** None

#### Topics

- System Overview
- Accessing Displays and Directories
- Discrete and Analog Control Module Operation
- Accessing Alarm Displays and Alarm Handling
- Motor Control Module Operation
- Regulatory and Cascade Control Module Operation
- Accessing Real-time and Historical Trend Data
- Unit Alarms
- Sequential Function Chart Operation
- Phase Logic Modules

### Delta<sup>V</sup><sup>TM</sup> Operator Interface for Batch Control — Course: 7014 CEUs: 1.8

#### Overview

This course is for operators, supervisors, and managers responsible for the operation of batch processes using DeltaV.

This 2-1/2 day course uses lectures and hands-on workshops to provide an in-depth overview on operating the DeltaV system. It includes all content in course 7012 plus students will:

- understand basic Batch terminology
- manipulate Unit Module parameters
- access the Batch Operator Interface
- run procedures
- review Batch history data

**Prerequisites** None

#### Topics

- System Overview
- Accessing DeltaV Displays and Directories
- Discrete Analog, Regulatory and Cascade Control Module Operation
- Accessing Alarm Displays/Alarm Handling
- Motor Control Module Operation
- Accessing Real-time/Historical Trend Data
- Accessing Process History View
- Sequential Function Chart Operation
- Phase and Recipe Controls
- Batch Operator Interface Batch Historian
- Campaign Manager

With over 65 years of training experience, Emerson Educational Services remains committed to providing quality training to our customers, when and where they need it. Each year nearly 20,000 individuals attend courses at one of our regional training centers, or participate in classes tailored to their particular needs and conducted locally or at their plant.

#### On-site, Local Training

Emerson Process Management develops hundreds of customized courses each year for our customers. You get targeted training that really works for you. Consider on-site training if your team:

- Needs to train several people at once
- Needs training focused on a specific topics unique to your organization
- Looking for an alternative to sending employees off-site, incurring expensive travel/lodging

We take all the guesswork and worrying about details out of the equation. Our on-site representatives are uniquely qualified to help you decide whether on-site training makes sense for your organization. Contact us today so we can train your team tomorrow!
