

Daniel Training has brought acclaimed gas and liquid fiscal flow measurement products, services and systems to the oil and gas industry. Around the world, the Daniel name is synonymous with quality, reliability and commitment to serving its customers.

Introduction to Natural Gas Orifice Measurement

Course D4120

Overview

This 3-day course covers basic principles, application, operation, calculation and maintenance of meters used in the measurement of gas with emphasis on natural gas. The course is designed for Engineers, field technicians and accounting personnel. Practical examples of real metering facilities will be covered.

Topics

- Introduction and Overview: Definition of Flow Measurement and a Brief History and Coverage of Common Terms Used in Gas Measurement
- Introduction to Types of Meters
 - Positive Displacement
 - Inferential Head Turbine
 - Others
- Standards for Gas Measurement
- Principles of Meter Operation and Systems
 - Positive Displacement
 - Flow Requirements
 - Measurement System (Readout)
- Meter Details
 - Orifice
 - Nozzle
 - Positive Displacement
 - Ultrasonic
 - Vortex Shedding
 - Target
 - Other
- Secondary System Details
 - Mechanical
 - Electronic
- Accuracy
 - Source of Inaccuracy
- System
- Summary
 - Accuracy
 - Economics

Price \$1,800

Location **Start Date 2012**

Available upon Request

Advanced Natural Gas Orifice Flow Measurement

Course D4320

Overview

This 3-day course covers application of metering to natural gas. The course is designed for experienced gas measurement personnel with basic fundamental knowledge of meters and their operation. Coverage of the latest concepts of design and equipment use will be presented to broaden the knowledge of the attendees.

Topics

- Design of Meter Stations
 - Contract Requirements
 - Other Concerns
 - Single Versus Multiple Tubes
 - Design Problems
 - Economics Versus Accuracy
- Accuracy of Gas Flow Measurement
 - Definition
 - How Obtained
 - New Concepts
- Influences In Gas Measurement
 - FERC 636 (Government)
 - Economics
 - Standards
 - New Technology
- New Metering Concepts
 - Computers as Analysis
 - New Devices
 - Ultrasonics
 - Vortex Shedding
 - Coriolis
- Future
 - Energy Forecasts
 - U.S. Gas Industry
 - World Gas Industry
- Summary

Price \$1,800

Location **Start Date 2012**

Available upon Request

Model 700 Advanced Gas Chromatograph

Course D4330

Overview

This 5-day course is most valuable to those with three years of chromatography experience, or those who have completed the introductory Daniel Operation and Maintenance of Gas Chromatographs course. Participants will develop an advanced understanding of gas chromatograph operation, troubleshooting and maintenance. Training even becomes "customized" when students present a chromatograph sales order number and application information. Given that data, the experienced Daniel instructor will look closely at specific applications and offer participants even more insight.

Prerequisites

D4210 Operation and Maintenance of Gas Chromatographs. Students should also be proficient in personal computer operations and have a basic knowledge of flow measurement.

Topics

- Chromatograph Flow Configurations
- Valve Overhaul
- Thermal Conductivity, Flame Ionization and Flame Photometric Detectors
- Sample, Carrier and Calibration Gas Systems
- Model 700 Hardware
- Installing and Using MON Software for Integration and Calibration
- Setting Timed Events, Retention Times and Response Factor Calculations
- Start-Up Procedures
- Setting Valve Timing and Flows with Different Flow Configurations
- Checking for Proper Separation and Analyzing Gas Chromatographs
- Verifying that the Chromatograph is Operating Properly
- Troubleshooting the Model 700 GC
- Configuring Reporting Details/Control Outputs
- Preventive Maintenance Service Procedures
- Communications and Modbus Registers
- Spare Parts and Tools

Price \$3,000

Location **Start Date 2012**

Houston, TX 1/30, 3/26, 6/11, 10/22

Note: Courses typically start at 1 PM on Monday and end at 12 PM on Friday to accommodate travel.

700XA Gas Chromatograph

Course D4313 **NEW**

Overview

This 5-day course is appropriate for those who have either worked with a chromatograph for at least six months or completed the 'Introduction to Gas Chromatographs' course. It prepares to operate and repair the new Danalyzer 700XA gas chromatograph for natural gas applications and will focus on the improvements in analyzer design and the new MON 2020 diagnostics and configuration software.

Topics

- Hands-on Learning That Explains the Chromatograph, How it Operates, and What it Does to Analyze Natural Gas
- 700XA Chromatograph Hardware
- Installation and Operation of MON2020 Software
- Dual Detector Applications (C9+) and the Hydrocarbon Dew Point Calculation
- Identifying Problems, Setting Timed Events, Preparing Samples, and Implementing Preventive Maintenance Procedures
- Troubleshooting
- Spare Parts and Service Tools

Price \$2,400

Location **Start Date 2012**

Houston, TX 2/6, 6/18, 8/20, 11/5

Note: Courses typically start at 1 PM on Monday and end at 12 PM on Friday to accommodate travel.

Operation and Maintenance of Gas/Liquid Ultrasonic Meters

Course D4230/D4280

Overview

This 5-day course prepares students to install, operate, and maintain Daniel multipath ultra-sonic gas flow meters. In addition to four days of instruction by one of our experienced instructors, each student receives a 12-section training manual.

Topics

- Basics of Sound Waves
- How Ultrasonic Flow Meters Work and Their Advantages over other Meters
- The Performance Characteristics of Transit Time Ultrasonic Flow Meters
- System Components and Mark III Electronics, including the Central Processing Unit (CPU) Board and the Option Board
- Meter Mechanics
- Removal and Installation of Transducer Assemblies
- Volumetric and Mass Ultrasonic Gas Flow Measurement
- Meter Installation Considerations
- Inform the Instructor if Working on Liquid Meter

Price \$2,400

Location **Start Date 2012**
Houston, TX 2/13, 3/12, 4/9, 6/25, 7/30,
 8/27, 9/24, 10/29, 12/3

Note: Courses typically start at 1 PM on Monday and end at 12 PM on Friday to accommodate travel

Introduction to Daniel Sr. Orifice Fitting

Course D4420

Overview

This 1-day course is for the beginner or experienced technicians. The students will learn the operation and how to repair and troubleshoot the Model 2000.

Prerequisites

Basic knowledge for flow measurement.

Topics

- Theory of Operation
- "C" Style vs. Model 2000
- Maintenance
- Operating Instructions
- Installation
- Hands-on Learning
- Troubleshooting
- New Features of M2000

Price \$600

Location **Start Date 2012**
Houston, TX Available Upon Request

Operation and Maintenance of Daniel S600 Flow Computers

Course D4260

Overview

This 2-day course provides students with an appreciation of the operation, design, capabilities and configuration of the S600 flow computer. This hands-on course deals with file transfer and machine recovery as part of the maintenance scope. The instructor will make use of the latest configuration software. Full supporting literature will be made available to all students.

Prerequisites

Basic knowledge of flow measurement.

Topics

- Introduction to the S600
- Board Removal and Layout
- Keypad Access and Security
- Menu Navigation
- Data/Mode Changing
- Alarm Handling and Configuration
- Configuring and Generating Reports
- Application Specific Functions
- Cold/Warm Starting Modes
- File Back-Up and Download
- Using the Configuration Software

Price \$1,800

Location

Houston, TX

Start Date 2012

Available Upon Request

Operation and Maintenance of the Daniel Compact Prover™

Course D4270

Overview

This 3-day course covers the operation, installation and maintenance of the Daniel Compact Prover™.

Prerequisites

Basic knowledge of flow measurement.

Topics

- Theory of Operation: Double Chronometry and Specifications
- Overview of the Parts Which Make up the Compact Prover such as Actuator Assembly, Pneumatic Spring Chamber, Piston and Poppet, Optical Switches, Hydraulic Motor and Pump, and Solenoid Valve
- Installation: Prover and Meter Location, Nitrogen Spring Plenum Setting, and Power Requirements
- Troubleshooting and Repair of: Safety Barriers, Seal and O-ring Replacement, Safety Barriers, Detector Switches, Interface Board, Hydraulic and Nitrogen System, and Spare Parts
- Overview of Calibration: Seal Leak Test, Upstream and Downstream Calibration, and Waterdraw Data Sheet
- Overview of Prover Electronics: Programming, Input and Data Modes Using Software/Local Display, Circuit Module Description, and Diagnostics

Price \$1,800

Location

Houston, TX

Start Date 2012

Available Upon Request

Operation and Maintenance to Control Valves and Turbines

Course 4290

Overview

This 3-day course covers the operation, installation and maintenance of the Daniel control valves and turbines.

Prerequisites

Basic knowledge of flow measurement.

Topics

- Theory of operation: Turbines, Valves, Digital Pilots
- Disassembly and Reassembly of Turbine Internals
- Disassembly and Reassembly of Valve Cylinder Assemblies
- Disassembly and Reassembly of Digital Pilots
- Valve Needle Valve Adjustment
- 'A' series vs. 'B' Series Control Valves
- Turbine Pick-Off Sensor and Preamp
- Flow Conditioning
- Parity vs UMB Series Turbine Meter
- Troubleshooting

Price \$1,800

Location **Start Date 2012**
Houston, TX Available Upon Request

Advanced Process GC

(Model 700 and 500)

Course D4311

Overview

This 5-day course equips students with a full understanding of many advanced techniques used in process gas chromatography. An experienced instructor and focused material enable students to troubleshoot a variety of field issues.

Prerequisites

D4210 Operation and Maintenance of Gas Chromatographs

Topics

- Setting Valve Timing
- Hardware Troubleshooting
- Mixture Adjustments for FID/FPD
- Proper Setting Timed Events
- Model 700 and 500
- Overview of Model 1000A
- Liquid Sample Injection
- Review of Sample System Techniques
- Calibration and Accuracy Checks
- Recovery of GC after Analysis Interruption
- GC Startup after Overhaul

Price \$3,000

Location **Start Date 2012**
Houston, TX Available Upon Request
