

SD Card Readers Qualified for the Version 2.0 Upgrade

The Version 2.0 Upgrade requires the use of an SD Card Reader. It is not possible to do this upgrade using the IR Port.

The following card readers have been qualified for use with the Version 2.0 upgrade:

SanDisk SDDR 99 (v4)

SanDisk SDDR 33

Kingston Travel Lite FCD – HS2MMC

Panasonic Toughbook

375 System Card Reader with USB Interface (Part No. 00375-0018-0022)

Use of any other SD Card Readers during this upgrade may result in corruption of the files. Emerson Process Management is not responsible for the cost of recovering corrupted SD Cards that have been used with an unapproved SD Card Reader.
