

Rosemount devices work hard every day to help you maximize your processes for optimal efficiency and safety. Our expert maintenance and repair is the only way to keep your Rosemount instrumentation in certified working order.

Our rigorous training and real-world experience means you get experienced, knowledgeable technicians who are dedicated to serving your needs. Our technicians have an average of 20 years of hands-on experience. As a result, they have thorough knowledge of proper configurations necessary to optimize your process.

Onsite. Or In Our Centers.
Consider It Serviced.

"At an aging facility, it is not responsible to cut budgets related to safety and maintenance without thoroughly examining the impact on the risk of a catastrophic accident."

– Carolyn Merritt
Chemical Safety Board Chairman

With field experts and Service Centers available to meet your needs, Rosemount Certified Services should be your first choice whenever your Rosemount devices need maintenance.

For more information, contact your Emerson representative or the North American Response Center at 1-800-654-7768.

Rosemount Certified Services At Your Site

Get your devices and processes off to the best start possible. Your site. Factory specifications. Our people. Your peace of mind.

Emerson's Instrument & Valve Services delivers field and repair services that are governed by the same exacting standards and processes used for Rosemount devices. Our experts help meet your legal, regulatory, and safety requirements. These onsite and repair services are Rosemount Certified – your guarantee of OEM specifications with your instrumentation.

Startup: From simple to complex startups, Emerson's Instrument & Valve Services experts will calibrate and configure Rosemount devices for your applications and business objectives using the manufacturer's proprietary processes and equipment.

Turnaround/Outage Services: Planned outages are a necessary part of your plant's life cycle. Our experts can help you save time and money with our onsite turnaround services. We will come to your site and return your equipment to OEM specifications.

Repair Services: Only our certified technicians have the training, technology, and experience to take care of your Rosemount instruments. These highly-trained technicians use proprietary processes and equipment to guarantee a return to OEM standards.

Parts Services: The experts from Emerson's Instrument & Valve Services are committed to minimizing your downtime. If we can't fix your devices onsite, we will quick ship devices to our Service Centers for repair. With 56 convenient locations, our Service Centers are dedicated to getting your process up and running as quickly as possible.

Calibration Services: Our expert field technicians have the skills, equipment and processes to properly diagnose and calibrate Rosemount devices to OEM specifications. They use the latest advanced Emerson tools, including AMS[®] Suite: Intelligent Device Manager, the 375 Field Communicator, and of course NIST traceable equipment certified in the Rosemount metrology lab. You can always be sure that your devices are calibrated to factory standards.

Diagnostic Services: Diagnosing problems. Presenting solutions. Our certified technicians have access to the latest Emerson diagnostic technologies. You'll get quick and accurate diagnostic services on your Rosemount devices from the people who know them the best.

Remote Seal Repair: Our expert technicians can restore and calibrate remote seals back to factory standards faster and more efficiently than third party repair services can. No one has more experience with Rosemount seals than we do. Every remote seal we repair, refill, or replace will match Rosemount's exacting factory standards down to the last spec.

Inventory Programs: Optimize your inventory. Our experts can perform inventory analysis and help you with all types of inventory programs, from consignment to maintenance. We offer programs at our Service Centers or at your site.

Advanced Tools: Our experts in the field use only the best equipment – everyone is trained on tools such as the 375 Field Communicator, AMS Device Manager, AMS Wireless SNAP-ON™ application, and a variety of other advanced Emerson diagnostic tools. Our Service Centers feature the latest and most up-to-date software and hardware to keep your equipment running at its peak.

Training Programs: As the certified experts in Emerson products, we offer training programs at your site or at our Service Centers. Call your Emerson representative to learn more about how we can help you.
