

# Fisher® Control Valve Services Portfolio

The way you manage key production assets like control valves directly affects facility performance and profitability. Fisher Lifecycle Services provides trusted expertise for reliability-centered control valve maintenance. With a network of owned and authorized service centers around the globe, we put experienced professionals where and when you need them.

Highly skilled technicians provide cost effective maintenance, valve reliability, and increased process availability through flexible, local service. Whether you are starting a process, planning maintenance or a turnaround, or using valve diagnostic technologies to extend your plant life cycle, we can help. With Emerson as your trusted partner you can realize the true potential of your production assets.

## Quick Ship Parts

## Predictive Diagnostics

## Quick Ship Assemblies

## Inventory Management

## Installed Base Tool

## Certified Repair

## Service Agreements

## Start-Up/Commissioning

## Asset Engineering

## Technology Upgrades

## Maintenance Training

## Turnaround Management

- **Quick Ship Parts** — Standard parts available in 24 hours. Expedited availability of machined parts
  - **Quick Ship Assemblies** — Valve assemblies available with expedited delivery
  - **Inventory Management** — Management of current customer stock, stocking levels, and stock reordering
  - **Installed Base Tool** — User software to help plan for outages and repairs
- AVAILABILITY
- **Certified Repair** — Repairs performed to the requirements of the Fisher Certified Standard
  - **Local Repair** — Repairs made at a customer site, Fisher service center, or authorized service provider
  - **Predictive Diagnostics** — ValveLink™ or Flowscanner™ equipment used to determine valve health
  - **Start-Up/Commissioning** — Labor performed during plants installation, startup, and operations
  - **Turnaround Management** — Outage coordination to manage a turnaround or outage through proven processes
- RELIABILITY
- **Service Agreements** — Valve services performed for a specific period of time
  - **Maintenance Training** — Certified training classes taught by Fisher trainers
  - **Technology Upgrades** — Product upgrades including wireless implementation and product migration
  - **Performance Optimization** — System-wide process optimization including loop tuning and process validation
  - **Asset Engineering** — Programs that help you to maximize availability, reliability, and optimization
- OPTIMIZATION
